Specs

Designed for use with Calypso Control System's Pro I/O line of Audio Video Controllers, you can control anything that is controlled via:

- Infra Red
- Serial
- Relay
- IP Address

For more information, see our White Paper at www.LoneTreeTechnology.com.

System Requirements:

Server: Windows 2000, Windows XP, or Windows 2003 server with 256MB Ram and 100MB Diskspace, running IIS or similar web server.

POS Terminal: Windows CE, 98, 2000, or XP touch screen terminal equipped with Internet Explorer Web Browser or similar. Also supports Linux Terminals.

Contollo™ is here!

You can have the same ability to operate your Audio / Video / Lighting System as the major sports facilities; and you can be in command of the system from your POS at a fraction of the cost!

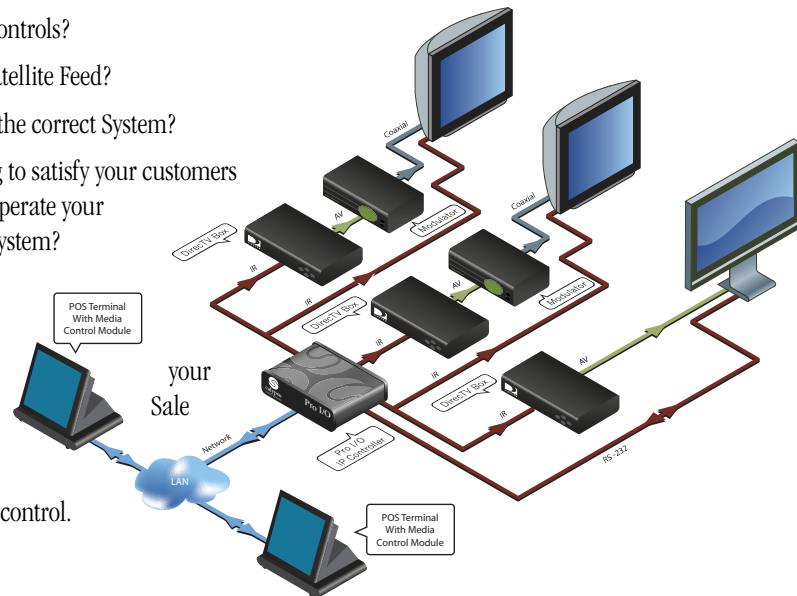

Outstanding Features

Does your staff need to change the channel on a TV, increase volume, change the lighting but are unable to:

- Find the Right Remote Controls?
- Figure Out the Correct Satellite Feed?
- Match the Audio Feed to the correct System?

Does your staff run around trying to satisfy your customers requests looking for or trying to operate your current Audio/ Video / Lighting System?

Lone Tree's Contollo software makes it easy and convenient to do, all from Restaurant Point of (POS) System! Turn your POS into your most powerful, easy to find and easier to operate remote control.

Benefits:

- **Simplicity** – Any employee with appropriate access to the POS can easily manipulate the various Audio Video System components or Lights with little or no training.
- **Control** – Contollo allows you to strictly control what employees can do with the Audio Video system. You can limit what channels can be selected and what features can be controlled.
- **Security** – By utilizing the security of the POS, AV Control can be limited to select employees as needed.
- **Access** – By utilizing the POS, AV Control can be achieved from any POS Terminal.
- **Cost** – By utilizing the POS, the cost of additional AV control panels is eliminated. The cost for this solution is less than one might think!
- **Space** – By utilizing the POS, wall space for additional AV control panels is not needed
