## PRESS RELEASE

### Lone Tree Technology and BlueStar Announce an Agreement

Centennial, Colorado Mar 16, 2007 BlueStar to Distribute Beverage tracker POS Interface from Lone Tree for the CAPTON Beverage Tracker Solution

BlueStar, the leading innovator in solutions-based distribution for Auto ID< Point-of-Sale and RFID products, is announcing a distribution agreement with Lone Tree to be the sole distributor of the company's Beverage Tracker POS Interface for Capton's Beverage Tracker RFID-based pour monitoring technology for the hospitality industry.

CAPTON's signature suite of Beverage Tracker solutions utilize RFID-enabled pour spouts that monitor liquor use and wirelessly transmit information on every ounce that is free-poured. These solutions are designed to prevent shrinkage without interfering with normal bar and banquet operations. CAPTON solutions record every drink poured by bartenders while still allowing the desired free-pour guest experience. Back office reporting delivers real-time analysis so potential mistakes or problems can be caught and corrected quickly before mistakes become bad habits. BlueStar is also distributing the CAPTON Beverage Tracker solution suite.

Lone Tree Technology's Beverage Tracker POS Interface takes CAPTON's Beverage Tracker solution and integrates it with an establishment's POS system. Current and soon to be supported POS systems include those from Aloha, Micros Systems, POSitouch, Posera Software, Dinerware, and Digital Dining. Once installed, the Lone Tree Beverage Tracker POS Interface enables hospitality establishments to create detailed reports such as a: Consumption Report, Variance Report, Pour Cost Report, POS Items Ordered, Engage/Disengage Report, Pour Log, Estimated Sales Report, Recipe Conformance Report, Brand Pour Summary, and Missing Pour and Over Pour Summary and Detail Reports. "We are very excited to be able to distribute the Lone Tree Beverage Tracker POS Interface alongside the CAPTON Beverage Tracker solution suite," says Mark Fraker, Director of Business Development for BlueStar. "Offering our customers the complete Beverage Tracker solution in a single stop makes great sense to everyone." According to Rob Johnson, President of Lone Tree Technology "We believe that this partnership will produce results where the sum is greater than the parts. We are confident that the outstanding leadership and marketing that is being delivered by the BlueStar Team will greatly improve our presence with this product."
